

Suyash Vakhariya

AI Engineer & Technical Product Manager

vakhariyasuyash@gmail.com — +91 9356179232 — linkedin.com/in/suyashvakhariya — github.com/lzumi6 — suyashvakhariya.com

PROFILE SUMMARY

AI Engineer and Technical Product Manager with hands-on experience in Machine Learning, Embedded Systems, and full-stack development. Published researcher in LLM agent architectures. Skilled in building structured ML pipelines, deploying production web applications, and leading projects through the complete SDLC. Strong analytical mindset with 22+ certifications across AI/ML, cybersecurity, and project management.

EXPERIENCE

Web Development Intern — Veracity Software Inc

Feb 2026 – Mar 2026

Full-time · On-site · Magarpatta City, Pune, Maharashtra

- Architected and deployed dynamic web applications through the complete SDLC, from requirements gathering to production deployment on cloud infrastructure.
- Engineered responsive, cross-browser compatible interfaces using HTML5, CSS3, Bootstrap, and React.js, improving page load performance and user engagement.
- Built interactive features and managed complex application state using JavaScript and React.js, integrating with RESTful backend APIs.
- Collaborated with cross-functional teams as a bridge between UI/UX design and backend integration, delivering milestones on schedule.

RESEARCH PUBLICATION

FAMM: Future-Aware Adaptive Memory Management Framework for Long-Term Autonomous LLM Agents

Suyash Vakhariya, Asmita Ipper · Zenodo (Preprint) · 2025 [DOI: 10.5281/zenodo.21168000](https://doi.org/10.5281/zenodo.21168000)

- Designed a novel memory management framework for long-term autonomous LLM agents addressing context limitations and memory degradation.
- Proposed adaptive memory organization, future-aware context prioritization, and intelligent retrieval mechanisms for improved reasoning continuity.

PROJECTS

WorkSphere OS — Enterprise Workflow Platform

Live Demo

- Built a full-stack SaaS platform with Node.js/Express, MongoDB, and JWT authentication — featuring task management, messaging, knowledge base, and role-based user admin.
- Implemented 10 data models, 9 API route modules, cron-based automation, and deployed to Vercel.

Neuromorphic Computing SNN

Pipeline: Research → Algorithm → Simulation → Evaluation

- Designed a Spiking Neural Network model to simulate adaptive neuron firing using Python and TensorFlow.
- Developed simulation flow in Jupyter Notebook, documented neuron activity patterns and architecture diagrams.

Email Spam Detection System — 96% Accuracy

Pipeline: Data Cleaning → TF-IDF → Model Training → Evaluation

- Built a supervised classification model using Python, scikit-learn with SVM and Naive Bayes on a 5,000-email dataset.
- Improved precision and recall through feature refinement with TF-IDF and hyperparameter tuning via GridSearchCV.

RFID-Based Car Ignition System (Embedded Security)

Pipeline: Circuit Design → Firmware → Integration → Testing

- Implemented RFID authentication using Arduino Uno, MFRC522 module, and relay for secure car ignition control.
- Enhanced reliability by adding signal validation loops, reducing false triggers by 80% during bench testing.

CloudSecure — Cloud Security Platform

Live Demo

- Enterprise cloud security platform with real-time threat monitoring, compliance dashboards, and AES-256 encryption.

TECHNICAL SKILLS

Languages:	C, C++, Python, Java, JavaScript, TypeScript, HTML5, CSS3
AI/ML:	TensorFlow, scikit-learn, Pandas, NumPy, NLP, TF-IDF, SNN, Regression, Classification, Hyperparameter Tuning
Frameworks:	React.js, Next.js, Node.js, Express.js, Bootstrap, Three.js, Django (basic)
Databases & Cloud:	MongoDB, MySQL, PostgreSQL, AWS, Docker, Vercel, REST APIs
Embedded:	Arduino, RFID/NFC, MFRC522, Sensor Integration, Embedded C
Tools:	Git, GitHub, VS Code, Jupyter Notebook, Linux, Jira (basic), Arduino IDE
Product & PM:	Agile/Scrum, SDLC, User Story Development, Roadmapping, Stakeholder Collaboration

CERTIFICATIONS

Siemens:	Certified Project Management Associate
IBM:	Generative AI for Software Development
HP:	Effective Leadership · AI for Business Professionals · Professional Networking

Tata Group:	Data Visualisation: Empowering Business with Effective Insights
Henry Harvin:	NLP Specialist · ML Engineer · Cybersecurity Analyst · Node.js Developer · Data Analytics Strategist + 6 more
Brainovision:	Java Full Stack with React & AI · App Development with AI · SDG & Industry Innovation

EDUCATION

Bachelor of Engineering (B.E.) — Computer Engineering	2023 – 2027
Savitribai Phule Pune University (SPPU)
